

CAP &
RFIAP  2026

Participant's Guide

July 6–8, 2026
University of Montpellier

**SSFAM (Société Savante Française
d'Apprentissage Machine)
and AFRIF (Association Française pour la Reconnaissance
et l'Interprétation des Formes) are jointly organizing
the CAp (Conférence sur l'Apprentissage automatique)
and RFIAP (Reconnaissance des Formes, Image,
Apprentissage et Perception) conferences,
which will take place on July 6-8 2026 at the Université
de Montpellier, Faculté des Sciences.**

**These two communities share many
common research challenges,
and we expect that this co-location
will foster highly
productive discussions.
While the conferences maintain
separate submission processes, several
joint sessions are planned.**

DISCOVER MONTPELLIER

MONTPELLIER HERITAGE: A THOUSAND YEARS OF HISTORY

Heritage lovers will be seduced by Montpellier and its relaxed atmosphere. Art in the city, medieval alleys, the sea just around the corner, walks in the garrigue...!

Nearly 70 sumptuous private mansions, an Arc de Triomphe and a Place Royale du Peyrou erected to the glory of Louis XIV, medieval alleys, the oldest faculty of medicine in the world... Here, aesthetics is combined with the past, the present and the future!

Fountains galore, including that of the Trois Graces, to mention only the best known of them, a pedestrianised “Écusson” city centre, colourful trams that combine gentle mobility and modernity, street art in all four corners of the city, not forgetting the feats of contemporary architecture that have made Montpellier a benchmark in this field... An open-air museum, created by all, for all.
